

Graduate Academic Certificate:

User Experience (UX) Design in the AI Age

The Program

This Graduate Academic Certificate prepares individuals to **create intuitive, inclusive, and data-driven digital experiences in our AI world.**

Through hands-on activities, students will learn how to research, design, and evaluate digital experiences that are effective, intuitive, and user-centric.

Provides skills needed for:

- UX Research & Design
- Information Architecture
- UI Design
- Digital Strategy
- Product Design

Who Can Benefit?

Whether you're a **working professional** looking to learn more about emerging technologies or a **new graduate** seeking a competitive edge, the information and skills this program provides will help further your career in an increasingly AI-driven world.

Fast Facts
