

In *Srinagar Burushaski: A Descriptive and Comparative Account with Analyzed Texts* Sadaf Munshi offers the structural description of a lesser-known regional variety of Burushaski spoken in Srinagar, the summer capital of the Indian-administered state of Jammu & Kashmir. The description includes a comprehensive and comparative account of the structural features of Srinagar Burushaski in terms of phonology, morphology, lexicon and syntax. The grammar is supported by an extensive digital corpus housed at the University of North Texas Digital Library. Using contemporary spoken language samples from Srinagar, Nagar, Hunza and Yasin varieties of Burushaski as well as data from the available literature, Munshi provides a thorough understanding of the historical development of Srinagar Burushaski, complementing the existing studies on Burushaski dialectology.

SADAF MUNSHI, Ph.D. (2006, University of Texas at Austin), is a professor of Linguistics at the University of North Texas (UNT). Her publications include articles in peer-reviewed journals and a digital corpus on Burushaski housed at the UNT Digital Library.
