The Master of Science in Health Informatics (MS-HI) program at UNT is designed to educate leaders in health informatics who can apply data science and information management methods and techniques to improve the delivery of healthcare with a patient-centered focus in diverse environments.

Courses are taught by faculty with professional expertise and experience in the healthcare industry and research productivity in global health challenges. The program has an interdisciplinary approach to the curriculum and research endeavors that bring together faculty and students from various backgrounds from healthcare, information science, data science, and information technology.

**PROGRAM HIGHLIGHTS**

- Professional development opportunities
- Relevant & flexible course offerings
- Nationally ranked by the EDVOCATE & CollegeChoice
- Faculty mentoring

**COURSE OFFERINGS**

- Medical Informatics
- Health Sciences Information Management
- Artificial Intelligence in Health
- Consumer Health Informatics
- Data Visualization and Communication
- Disaster Management for Information Professionals

**CAREER PATHS**

- Clinical Data Analyst
- Pharmacy Informatics Specialist
- Electronic Health Records Implementation Manager
- Chief Medical Information Officer
- Health Informatics Director
APPLICATION PROCESS

Admission Requirements

- An undergraduate degree or higher from an accredited institution.
- A 3.2 cumulative undergraduate GPA or a 3.5 on a completed master's degree.

How to Apply

1. Apply to the UNT Toulouse Graduate School:
   a. Complete the online application via ApplyTexas and pay the application fee.
   b. Submit transcripts from all colleges attended.
   * International applicants may have additional requirements and must demonstrate English Language Proficiency.

2. Apply to the Department of Information Science:
   Upload the following documents:
   a. Statement of purpose
   b. Two letters of recommendation
   c. A resume/ CV

**GRE not required.

STUDENT RESOURCES

Scholarships - To recognize exceptional academic and creative accomplishments, the University of North Texas, the College of Information, and the Department of Information Science offer financial support and scholarship opportunities.

Career Coaching & Internships - The College of Information provides a dedicated career coach to help students prepare for the job market.

Mentorship - The College of Information Mentorship Program connects students and industry experts, enabling students to network and enhance their professional knowledge and skills.

"The interdisciplinary nature of the health informatics program allowed me to gain the skills and confidence to work in the healthcare field. Both the domain and technical knowledge offered were tremendous assets that I leverage every day in my work. The faculty are experts in their fields and engaged us in research projects and internship opportunities. This program is easily one of the best investments I have made."

Iram Fatima
Data Analyst
