Why choose UNT's M.S. in Information Science?

- Online master's in information science program ranked 2nd in the nation by OnlineCourseReport.com, and the Graduate library and information studies program ranked 20th in the nation by U.S. News & World Report.
- Dedicated career coach helps students prepare for the job market.
- Member of the iSchools organization.

"The graduate Information Science program at UNT prepared me immensely for my career in information security. As a student, I learned not only about security fundamentals but also practical applications of information science, cybersecurity, and data science in a professional environment. By being a part of the Information Science program, I was able to network and build relationships with other tech professionals and also gained unique academic opportunities such as presenting my student research at the annual Women in Cybersecurity (WiCyS) Conference. The knowledge gained and the relationships formed as a result of being in the Information Science program make it a great personal and professional investment."

Lola Obamehinti (MSIS '17)
Founder, Nigerian Techie
