Learning Technologies (LT) is a professional field that encompasses a broad range of communication, information and related technologies that are used to support learning, teaching and assessment. LT professionals engage in iterative and systematic activities of strategic planning, designing, developing, implementing, and evaluating instructional processes, tools, and resources. Drawing theories and methodologies from various disciplines (e.g., educational psychology, cognitive science, computer science, communications, anthropology, and neuroscience), LT is an interdisciplinary field that prepares graduates for careers in a variety of industries, including corporate sector and industry, higher education, k-12 schools and government.

36 Hour Program
- 12 Hours Core Courses
- 12 Hours Foundation Courses
- 12 Hours Program Concentration

Admission Considerations
- GRE Not Required
- Average GPA of Admitted Students is 3.5 (last 2 semesters)
- Minimum GPA is 3.0

Portfolio Instead of a Thesis

Funding
- Competitive Graduate Assistantships and Scholarships are available

 Marketable Skills
- Instructional design and development
- Instructional technology management & coordination
- Multimedia content creation
- Management of technology-based projects
- Management of online content

Why choose UNT’s M.S. in Learning Technologies?

- Online master’s in learning technologies (educational technology) program ranked 2nd for best value by CollegeValuesOnline.com, 2nd in the nation for affordability by TopMastersinEducation.com, and 11th in the nation by intelligent.com.
- Multiple concentrations are offered, including Artificial Intelligence in Education and Learning Analytics, Instructional Design and Technology, Teaching and Learning with Technology, and Workforce Learning and Performance Management.
- MS in Learning Technologies is a STEM program and is offered both online and in person.

Possible Career Paths

- Instructional Designer
- e-Learning Specialists
- VR/AR Curriculum developer
- Corporate Trainer
- AI Learning Solutions Analyst
- Learning Data Analyst
- Learning Data Scientist

“I was in my final semester of the M.S. in Learning Technologies program when I interviewed for an instructional designer position at Peterbilt. When they asked questions, I had examples. I was able to say, ‘Oh, you need onboarding training? I’ve made onboarding training for three different companies. You want backend web development for your e-learning modules? Great! I’ve developed e-learning modules. Here’s an example.’ That’s what UNT helped with the most — giving me the confidence to speak the language and to try new things and get feedback.”

Carrie Burt
Instructional Designer
Peterbilt Motors Company

In-person Mode

There are two start times each year (Fall and Spring sessions) for in-person mode. Students in in-person mode generally take 3-6 hours each semester and complete the degree in 2-5 years. International students must comply with their visa requirements.

Online Mode

The online mode is delivered using 3-, 8-, 10-, and 16-week course formats depending on pedagogical requirements and semester. There are five start times each year (2-Fall sessions, 2-Spring sessions, and 1-Summer session).
