Why choose UNT's M.S. in Learning Technologies?

- **The online master's in learning technologies (educational technology) program is ranked 2nd in the nation for best value by CollegeValuesOnline.com, 2nd in the nation for affordability by TopMastersinEducation.com, and 11th in the nation by intelligent.com.**

- **The M.S. in Learning Technologies is a STEM-designated program and is offered both online and in person.**

"I was in my final semester of the M.S. in Learning Technologies program when I interviewed for an instructional designer position at Peterbilt. When they asked questions, I had examples. I was able to say, 'Oh, you need onboarding training? I've made onboarding training for three different companies. You want backend web development for your e-learning modules? Great! I've developed e-learning modules. Here's an example.' That's what UNT helped with the most — giving me the confidence to speak the language and to try new things and get feedback."

Carrie Burt
Instructional Designer
Peterbilt Motors Company

Possible Career Paths

- **Instructional Designer**
- **e-Learning Specialists**
- **VR/AR Curriculum developer**
- **Corporate Trainer**
- **Learning Data Scientist**
- **Learning Data Analyst**
- **AI Learning Solutions Analyst**

Optional Concentrations:

- Artificial Intelligence in Education and Learning Analytics
- Instructional Design and Technology
- Teaching and Learning with Technology
- Workforce Learning and Performance Management

A general M.S. in Learning Technologies degree is also available for those who do not pursue a concentration.
